Vascular And Interventional Radiology: The Requisites

Synopsis

Part of the definitive Requisites series, this volume offers all the essentials necessary to pass exams in radiology and practice in the field. Practicing radiologists will use it as a handy, practical, daily reference tool in this subspecialty area. The first part on Vascular Radiology covers the following topics: vascular imaging techniques; vascular pathology; lower extremity and pelvis; abdomen; thorax; and the great vessel. The second part on interventional radiology covers topics such as: basic principles; vascular interventional techniques; biliary tract; GU and reproductive systems; gastrointestinal system; biopsy and drainage in the abdomen; cervicothoracic biopsy; and drainage in the thorax. Provides a comprehensive yet manageable review of the principles and practice of vascular and interventional radiology for the resident preparing for exams and for the practitioner needing a quick-consult resource of information. Provides a solid foundation laid in the basics of state-of-the-art vascular and interventional radiology. Includes discussion of vascular procedures in the lower extremity and pelvis, abdomen, thorax, and great vessel, and other interventional procedures in the biliary tract, GU and reproductive tracts, GI tract, and thorax, placing principles in a clinical context. Includes personal and to-the-point discussions in a well-organized format, providing a friendly tone for enjoyable, effective learning. Appropriate to read from cover-to-cover or to skim for off-the-shelf consultation. Provides chapter-opening outlines revealing topics to be covered in the chapter and providing a useful search engine for quick location of material. Includes numerous boxes and tables which highlight differential diagnosis, radiologic patterns of disease, key findings, indications for procedures, procedural steps, handy tips, and other critical guidelines to emphasize key facts and concepts and help the reader identify and absorb important information. Includes approximately 750 high-quality, multimodality images integrated into text. Provides a suggested readings list of journal articles and books relevant to the chapter topic at hand, recommending further study and review. Part of the highly-acclaimed series, THE REQUISITES, which offers an effective formula for exam preparation and practical daily reference.

Book Information

Series: Requisites in Radiology

Hardcover: 510 pages

Publisher: Saunders; 1 edition (December 5, 2003)

Language: English

ISBN-10: 0815143699

ISBN-13: 978-0815143697

Product Dimensions: 11.1 x 8.7 x 1.3 inches

Shipping Weight: 4.9 pounds

Average Customer Review: 4.6 out of 5 stars [See all reviews](#) (7 customer reviews)

Best Sellers Rank: #763,333 in Books (See Top 100 in Books) #111 in [Books > Medical Books > Medicine > Surgery > Thoracic & Vascular](#) #229 in [Books > Medical Books > Medicine > Internal Medicine > Radiology > Diagnostic Imaging](#) #504 in [Books > Textbooks > Medicine & Health Sciences > Medicine > Clinical > Cardiology](#)

Customer Reviews

Excellent review of the basics. I have been in IR for 20+ years and am using this book as my only source for studying for the re-cert in CAQ, so hope all goes well. I have spoken with the author (Kaufman) about difficult cases, and he has been most helpful. N.B. I just received my "Pass" from the ABR. I finished the 4 hour test in 70 minutes. All one needs is this book.

Very little extra here. Just a basic good interventional text. Sort of an Interventional 101. I would recommend this for residents.

This is one of the better of this series. Good images and cases. It's a solid place to begin with your studying.

Everything perfect: The service, timing and quality of the book. I have no complain. Recommended 100%
