Cardiac Rhythm Disorders: A Nursing Process Approach

Synopsis

A comprehensive guide to the identification, analysis and management of cardiac arrhythmias. It provides students with an understanding of the 12-lead ECG as a diagnostic and monitoring tool, and discusses each arrhythmia in a nursing process framework, featuring assessment, diagnosis, planning, intervention and evaluation. It includes self-assessment sections comprising multiple-choice, true/false, matching and short answer questions, as well as case studies with sample strips for practising identification, analysis and care planning to help readers evaluate their diagnostic abilities.
