Customer Reviews

I bought this book for a business library course. After reading the whole textbook, I felt I had a much better grasp on what resources are available online for business librarians or anyone wanting to know more about the business library world. The textbook was very well organized, and the authors were very detailed about subjects such as company information, marketing, industry information, statistics, accounting, and stocks.I highlighted much of the textbook just because the information was so useful to me. As someone who works in a public library setting, I never know when I will get an involved business question, and this book very much prepared me for that. I plan to keep this right next to me at work to grab when I need business resource information. I would highly recommend this for someone pursuing a MLIS with a concentration in business.

I am using textbooks for school. is the single best way to get affordable textbooks.I graduate May 2016. Yes!!!
